

Sure-K Provides Options for Soybeans

Soybean Fertilizer Programs in a Permanent Plot Rotation

North Central Research Station: 2011 - 2015

Permanent Plots are a long-term fertilizer comparison in a corn/soybean crop rotation. Conventionally used fertilizer programs are compared to AgroLiquid fertilizer programs and soil tests levels are monitored over time. Complete results can be found on our website.

- High Efficiency
- Low Injury Potential
- Application Flexibility
- Research Proven

Planter Applications:

Seed and fertilizer
in one pass

Foliar Applications:

Mix and apply with
postemergence
pesticides
